Sources:

- Data and UNCTAD secretariat estimates based on UNDESA *COMTRADE* and IMF, *Direction of Trade Statistics* databases

Notes:

- (1) Estimation. The 1995 trade data are derived from reported *COMTRADE* data by a 3-moving average.
- (2) Estimation. The 1995 trade data are derived from reported *COMTRADE* data under Belgium-Luxembourg Union by simple linear regression.

Sources :

- Données et estimations du secrétariat de la CNUCED sur les bases de données *COMTRADE* de ONU DAES et *Direction of Trade Statistics* du FMI

Notes :

- (1) Estimation. Les données de 1995 sont dérivées des déclarations rapportées dans la série *COMTRADE* auxquelles on applique une moyenne mobile de période 3.
- (2) Estimation. Les données de 1995 sont dérivées des déclarations rapportées dans la série *COMTRADE* sous l'Union belgo-luxembourgeoise par regression linéaire simple.

Sources:

- Data and UNCTAD secretariat estimates based on UNDESA COMTRADE and IMF, Direction of Trade Statistics databases

Notes:

- (1) Estimation. The 1995 trade data are derived from reported COMTRADE data by a 3-moving average.
- (2) Estimation. The 1995 trade data are derived from reported COMTRADE data under Belgium-Luxembourg Union by simple linear regression.

Sources :

- Données et estimations du secrétariat de la CNUCED sur les bases de données COMTRADE de ONU DAES et Direction of Trade Statistics du FMI

Notes :

- (1) Estimation. Les données de 1995 sont dérivées des déclarations rapportées dans la série COMTRADE auxquelles on applique une moyenne mobile de période 3.
- (2) Estimation. Les données de 1995 sont dérivées des déclarations rapportées dans la série COMTRADE sous l'Union belgo-luxembourgeoise par régression linéaire simple.

3.2.D Export structure by product Individual countries and territories

3.2.D Structure des exportations par produits Pays et territoires individuels

Sources:

- Data and UNCTAD secretariat estimates based on UN DESA *COMTRADE* and IMF, *Direction of Trade statistics* databases

Notes:

- (1) The symbol ** indicates the grouping to which the country belongs and the percentage share shown applies. The percentage is the share of exports of each commodity shown by the country in the relevant grouping total exports for that commodity (i.e. "developing", which refers to developing economies; "transition", which refers to transition economies and "developed", which refers to developed economies).
- (2) Leading products exported in 2007.

Sources :

- Données et estimations du secrétariat de la CNUCED sur la base de données *COMTRADE* de ONU DAES et *Direction of Trade Statistics* du FMI

Notes :

- (1) Le symbole ** indique le groupement auquel le pays appartient et par rapport auquel est calculé le pourcentage. Ce pourcentage est la part que représentent les exportations du produit par le pays par rapport aux exportations du même produit par le groupement auquel le pays appartient («developing» se réfère aux économies en développement, «transition» aux économies en transition et «developed» aux économies développées).
- (2) Principaux produits exportés en 2007.

3.2.E Export structure by product
Major exporters for leading products
among developing economies

3.2.E Structure des exportations par produits
Principaux exportateurs de produits majeurs
parmi les économies en développement

Sources:
- Data and UNCTAD secretariat estimates based on UN DESA COMTRADE and IMF,
Direction of Trade Statistics databases

Notes:

- (1) In addition, are presented for each product group the world total exports, the exports from developed, transition and developing economies.
- (2) Commodity groups are selected on the basis of ranking by value.

Sources :
- Données et estimations du secrétariat de la CNUCED sur la base de données COMTRADE
de ONU DAES et *Direction of Trade Statistics* du FMI

Notes :

- (1) Les exportations mondiales totales, les exportations des économies développées, en transition et en développement sont également présentées pour chaque groupe de produits.
- (2) Les groupes de produits sont sélectionnés d'après le classement par valeur.

3.3 Concentration and structural change indices of product markets Imports

3.3 Indices de concentration et de changement structurel des marchés de produits Importations

Sources:

- Data and UNCTAD secretariat estimates based on UN DESA *COMTRADE* and IMF, *Direction of Trade statistics* databases

Notes:

(1) Concentration index:

The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

H_i = value of concentration index for product i

x_{ij} = value of exports or imports for country j and product i

$$X_i = \sum_{j=1}^n x_{ij} \text{ and}$$

n = maximum number of individual economies over the period from 1995 to 2006.

An index value that is close to 1 indicates a very concentrated market. On the contrary, values closer to 0 reflect a more equal distribution of market shares among exporters or importers.

(2) Structural change index:

This index, ranging from 0 to 1 reveals the structural change in trade for a particular product as compared to the reference year (1995 = 0).

An index value close to 1 indicates a significant change in the composition of exporters (importers). On the contrary, values closer to 0 would demonstrate a higher degree of "traditionality" in the markets over the period concerned.

The value is calculated as follows:

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

where

I_i = Value of structure index for product i

S_{ij}^0 = Share of trade of product i for country j in 1995

S_{ij}^1 = Share of trade of product i for the country j in the concerned year

Sources :

- Données et estimations du secrétariat de la CNUCED sur la base de données *COMTRADE* de ONU DAES et *Direction of Trade statistics* du FMI

Notes :

(1) Indice de concentration :

L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

où

H_i = Valeur de l'indice de concentration pour le produit i

x_{ij} = Valeur des exportations ou des importations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij} \text{ et}$$

n = nombre maximum d'économies individuelles sur la période allant de 1995 à 2006.

Un indice proche de 1 indique une concentration très forte du marché pour ce produit en particulier. En revanche, une valeur proche de 0 démontre une répartition plus homogène du commerce entre les exportateurs ou les importateurs.

(2) Indice de changement structurel :

Cet indice, dont la valeur est comprise entre 0 et 1, représente les changements de structure du commerce par rapport à une année de référence (1995 = 0).

Une valeur proche de 1 indique un important changement structurel du commerce de ce produit, c'est à dire, une grande variation des parts de marché au sein des exportateurs ou importateurs, par rapport à l'année de référence. Plus la valeur de l'indice est proche de 0, plus la structure du commerce de ce produit est stable.

Il est calculé comme suit :

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

où

I_i = Valeur de l'indice de changement structurel, pour le produit i

S_{ij}^0 = Part du commerce du produit i pour le pays j par rapport au commerce total de ce produit pour l'année 1995

S_{ij}^1 = Part du commerce du produit i pour le pays j, par rapport au commerce total de ce produit pour l'année concernée
